BRICK COLLECTION

LONG BRICKS SPEC GUIDE

LOHASAU.COM

Wasserstrich Special:

With Wasserstrich Special, your facade radiates raw elegance. Because the long, slender stones have a rough edge.

The weathered, slightly planed look is the result of a clever mix of natural clay and water during a unique production process. The clay is pressed in a mold, rolled and then stripped according to the Wasserstrich method.

All kinds of color shades are given free rein on the matte, sand-free stone.

Versatile application

You process the bricks as you wish, both for new construction and renovation projects. Consider, for example, thin masonry or gluing with the long, slender bricks to emphasize the linear character of the facade. In this way, the robust look and trendy appearance of Wasserstrich Special come into their own.
