-

Basia bricks are hand-moulded, featuring a distinct grained appearance. This collection emphasises pure and intense colours, giving every facade a powerful and pure character.

A robust eye-catcher

Basia gives voice to every facade. The fundamental colours include red, black, yellow, and greige. The deep colour intensity is achieved because the sanding on the brick matches the brick's colour. The Basia collection features five shades: Strobloem, Plaza, Paepestein, Spaans Rod, and Nero Zwart Mangan.

For renovation or new construction

Apart from the traditional formats, Basia is also available in Eco-brick size, which is up to 3.5 cm narrower than standard facing bricks. This allows for increased insulation and additional living space along the entire length of your construction project. Basia is also available upon request as strips for added flexibility in design.
